***Detailed Action***

This office action is in response to the correspondence received on May 15, 2008.

***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 15, 2008 has been entered.

***Claim Objections***

Claim 11 is objected to because of the following informalities: The term "and" is listed twice (see lines 16-17). This is believed to be a typographical error. Appropriate correction is required.

Claim 15 is objected to because of the following informalities: The claim ends with a comma followed by whitespace and then a period. This is believed to be a typographical error. Appropriate correction is required.

***Claim Rejections - 35 USC § 101***

Claims 1, 5-6, 10-11, 15-16 and 37-47 are rejected under 35 U.S.C. 101 because the claimed invention describes an apparatus and system that are not limited to tangible

Art Unit: 2145

embodiments since there is clear intrinsic evidence that the invention is intended to be enabled as software, propagated signals or combinations thereof, per se (*as explained within paragraph 22 of the detailed description portion of the application's specifications*). As claimed, an apparatus and system that can be enabled as software or propagated signal are not limited to a physical article or object required to establish a statutory category of invention as a machine, manufacture, process or composition of matter. As such, the claims are not limited to statutory subject matter and are, therefore, non-statutory. Hence, in order to overcome this 35 USC § 101 rejection, the above claims or specifications need to be amended to include only the physical hardware and not the software or the propagated signal or other intangible or non-functional media.
